Skills

- Python | Java | JavaScript | HTML | CSS | MySQL | MongoDB | Git
- jQuery | Flask | Node | Express | React
- Frontend | Backend | Full-Stack | Restful APIs | OOP

Projects

SOLEY SHOES: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

An e-commerce store for shoes using Python, Flask, and MySQL.

- Implemented sneaker database API call to populate the database with the top 100 shoes in each brand to generate and display them on the store page randomly.
- Created front-end templates utilizing the Bootstrap framework and the Jinja templating engine in Python.

RHYTHM & CHORDS: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

A musical website to find lessons using the MERN Stack.

- Created a full CRUD (Create, Read, Update, Delete) web application using MERN technologies.
- Implemented a login and registration feature using jsonwebtoken.

BOOK CLUB: Full Stack Developer | [GitHub Repo](#) | [Video Demo](#)

A book share website built as a Java SpringBoot Application.

- Created a full CRUD (Create, Read, Update, Delete) web application with validations using springboot application technologies.
- Implemented a login and registration feature with validations.
